Help in Case of Accidents

BURNS AND SCALDS.—Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil and lime-water. Shock, which is always present in severe burns, requires the administration of stimulants. Pain is more constant and intense in burns than in any other form of injury, and requires sedatives, which should be administered by the medical attendant. Later on the appearances of inflammation and other complications are to be carefully watched for.

SUFFOCATION FROM INHALING ILLUMINATING GAS.—Get into the fresh air as soon as possible and lie down. Keep warm. Take ammonia—twenty drops to a tumbler of water, at frequent intervals; also, two to four drops tincture of nux vomica every hour or two for five or six hours.

MAD DOG OR SNAKE-BITE.—Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whisky, brandy, etc.

FIRE IN ONE'S CLOTHING.—*Don't run*—especially not downstairs or out-of-doors. Roll on carpet, or wrap in woolen rug or blanket. Keep the head down, so as not to inhale flame.

FIRE FROM KEROSENE.—*Don't use water*, it will spread the flames. Dirt, sand, or flour is the best extinguisher, or smother with woolen rug, table-cloth, or carpet.

CINDERS IN THE EYE.—Roll soft paper up like a lamp lighter, and wet the tip to remove, or use a medicine dropper to draw it out. Rub the *other* eye.

FAINTING.—Place flat on back; allow fresh air, and sprinkle with water. Place head lower than rest of body.

STINGS OF VENOMOUS INSECTS, ETC.—Apply weak ammonia, oil, salt water, or iodine.

LIGHTNING.—Dash cold water over a person struck.

BLEEDING WOUND.—If from an artery, stop the current of blood to the wound by putting a compress or cloth pad over the artery. Fasten it firmly by a handkerchief or bandage, which may be tightened by twisting in a stick as a binder. The location of the artery can generally be determined by the throbbing sensation. If from a vein, apply pressure directly over the wound or by exposure or application of cold water. Perchloride of iron may be applied with cloth or lint. Keep the part elevated.

Help in Case of Accidents

HÆMORRHAGE.—The usual treatment is rest in the recumbent position; small pieces of ice should be freely swallowed, and the application of ice wrapped in a towel or in an ice-bag, or snow, cold water, etc., over the stomach; hot applications may be applied to the extremities.

FIRE IN A BUILDING.—Crawl on the floor. The clearest air is the lowest in the room. Cover head with woolen wrap, wet if possible. Cut holes for the eyes. *Don't get excited.*

SHOCK.—If faint and cold, give stimulant in small doses, once in fifteen or twenty minutes, and secure warmth by external application or rubbing.

DROWNING.—1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's apple" back (so as to close entrance to stomach) direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. DON'T GIVE UP! People have been saved after HOURS of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give WARM drinks, or spirits, in teaspoonfuls, fresh air, and quiet.

SUNSTROKE.—There are two important indications for treatment—reduction of temperature and the use of stimulants. The patient should first be removed to a cooler spot if possible, or at least where shade can be secured. The treatment should be begun at once. The clothing about the neck and body must be either loosened or removed. Cold is particularly indicated in cases where there is great heat of the body, and delirium and convulsive movements are present. This means of reducing the temperature may be applied in the shape of cracked ice about the head and spine, or the use of cold water. If the heat of the body is very great, it may be necessary to wrap the patient in sheets wet with cold water. If there is, besides the great heat, evidence of serious depression, stimulants must be used while the cold is being applied.

A standard of time was established by mutual agreement in 1883, among the railroads, by which trains are run and local time regulated. According to this system, the United States extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour, commencing with the 75th meridian. The first (eastern) section includes all territory between the Atlantic Coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last-named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific Coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York City (eastern time), the time at Chicago (central time) is 11 o'clock A. M.; at Denver (mountain time), 10 o'clock A. M., and at San Francisco (Pacific time), 9 o'clock A. M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, 1 minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

60 seconds (″) = 1 minute ′
60 minutes = 1 degree °
360 degrees = 1 circle ⊙

Every 15 degrees of longitude are equivalent to one hour variation of time.

Weights and Measures

Rules for Computing Interest

The following will be found to be excellent rules for finding the interest on any principal for any number of days. When the principal contains cents, point off four places from the right of the result to express the interest in dollars and cents. When the principal contains dollars only, point off two places.

Two per Cent.—Multiply the principal by the number of days to run, and divide by 180.

Three per Cent.—Multiply by number of days, and divide by 120.

Four per Cent.—Multiply by number of days, and divide by 90.

Five per Cent.—Multiply by number of days, and divide by 72.

Six per Cent.—Multiply by number of days, and divide by 60.

Eight per Cent.—Multiply by number of days, and divide by 45.

read and worked on essay. rd. and talked with folks in even. This the first day passed very uneventfully. I enjoyed reading today a book dealing with the process of constructing our Constitution as it was done during the summer of 1787 here in Phila. The spirit of compromise seemed to be predominent. Each wished that there might be ultimate success even if his own particular wishes and ideals were sacrificed. Out of such a spirit alone could such a document have come.

Father considered that it would be immediately necessary for President Wilson to intervene in Mexico. I am afraid if he does we will soon find that unhappy state on our hands.

I have high ideals for this year in the lines of work and friendship. May God be with me.

rd. worked on essay in a.m. lib. book store in p.m. went over to Alexanders' in even. played and listened to their Angelus piano player with Beethoven's Moonlight Sonata (27), First movement of the Pathetique. There is not the human element in such an instrument. Some friend playing those pieces would make all the difference in the world to me.

Mr. Alexander showed me pictures from their trip to Korea, Japan, China & Alaska of last year. I was impressed again by the beauty of the country of Japan. From the pictures I have seen there has been a spell woven about me. There seems to be a great difference between the peoples of the three lands Mrs. A. said they have a saying in Japan that the Japanese wash their bodies, the Koreans their clothes and the Chinese neither.

The cold dark pines of Alaska and Canada appealed to me strongly. There is a beauty in the north. It is dark and true and tender in its way.

rd. in a.m. lib. in p.m. rd in even. I had an interesting time looking over the representitive illustrated weeklies of France, Germany and England. I have just been reading about Germany and England in relation to the more intimate details of their every day life. I found there was a new interest in these papers for me keeping in mind what I had read about the countries.

I worked a while on my essay. It is quite a matter to get it in shape. I believe there is some thing in it worth while but it is hard to get it to the surface.

I am looking forward this year to my friendships. I expect to make a lot of those I have now and acquire some more if it be God's will.

Grandfather came today from Delhi to spend some time here.

Ch. dined at White's Ethel Boswell was there. had a quietly satisfying sort of time. S.S in p. m. Ch. in even. I became acquainted with Miss Chance a girl who sang soprano today. She has a beautiful voice. I felt interested in her somehow and that has before meant the beginning of a friendship. I always feel a thrill like a discoverer must have as I stand on the threshold of an acquaintance. There are such infinite possibilities that it amazes one. "A friend is rather to be chosen than great riches" Knowing exactly what friendship is in various phases I can now walk on in confidence of my ground. No substitute can fool me now having Anne Mae Gregor's friendship as an experience. Life is full of great things if we but have eyes to see them and understand.

went down to meet Esther but missed her. Id. watched the men working on the organ off and on during the day. Esther came in late in the afternoon and I walked home with her. I have never become intimate with her to any great degree. I think it is partly because she is quite closely connected with the folks here and I have never felt free with them in my confidence. That is what has to do with just my inmost self. I doubt if elder people can ever be confidantes in such things. They are too wise to appreciate them.

Life is a very complex thing. I feel troubled over it often. I ponder over everything and it takes away smiles sometimes.

Music does indeed have some inimitable language whereby it can go down beneath the surface of the soul and reach the depths. To me when I listen to Anne Yeager's playing or used to hear Sam Rogers play I felt the whole meaning of friendship. ch. coll. very. Dwent back on the varsity today as I had prayed to do. God has certainly been with me. Tonight Geo. W. Perkins spoke at Y.M. Afterwards a group of us had our prayer meeting. It was one of the greatest things in my life. There were eight of us. The prayers that went up to God were from our hearts. I believe by this means Princeton is to be changed if by any means. My prayer life is becoming one one of the greatest things in my life. Oh if by this we will be able to win some of our fellows here to Christ. That is the aim of it all. God was with us tonight we could feel the presence of Christ in the room so holy was it.

ch. call. stg. powed. I spent all the evening with Mar Chaplin talking over God's work here. We want to make it a good work here which will win men to a clearer knowledge of Christ and his kingdom. It must be a personal work and must be backed by prayer continually with every hope that is prayed. With God behind us we are safe in the issue of the actual work. ch. call. stu. rewed. I did not go very well today. This is one of the nights when my heart is heavy. But I recollect how I have come through these times before all right by God's help and my trust in Him. I have done what has been done by His aid and I believe He will see me through. That is my only hope I have. People are looking for me to do it now. and God knows all that it means to me. He is my High Power and I believe He will keep that which I have committed to Him.

ch. coll. rd. rewed. Sf went a lot better today. My heart was heavy till I saw how it did go. God as usual pulled me through all right. He always makes good with his part of the bargain. Life without Him would be a continual reign of terror. I am fearful of my own power. It has failed so often. Now with a feeling of God's nearness I have a strength which can meet all things without fear, even that greatest enemy Death for my Pilot stands ready with a lying hope that only brighter Shore where I will be with Him.

I went to Δ Show with Ell. Harry & James Harris & White. I had a nice time. They have the front campus lined with lights and everything has that artificial dressed up self conscious look that is deadly. Those that come here, and rave about it are easily pleased. If this suits them as it is these days. I would like to skip my commencement & leave us may always all is natural

Baccalaureate Sermon in a.m. Crusaders' met in p.m. It was a most wonderful time for me. I expect becoming a member of the little band of men from the past few classes is going to mean everything to me. It will act like a anchor for me in many ways.

Dud. Cross, Jack, Tom & I lay on the grass in eve. Katy Bunnie & Ted came. Dud and I had a brief visit before the rest came. He is pure gold that boy. I am coming to know bit by bit his inner self. Like so many he has I believe a deep feeling regarding religion and God. My task must be to bring to a flower and fruitage the budding promise of his spiritual life. It is the same with all. They are worth it indeed.

left Pt. 7:57 a.m. Mac and Delly 9:30 p.m. Back I am back again to this place. I guess I am glad of it. I am a bit fatigued tonight. Father tells me his worry which Rumme is not to hear and she tells me hers which Father is not to hear. They both have them and the worries are great as such. I must not let them be such for me. It is all right to look a possible evil straight in the face but I do not believe God means us to keep at them like a spectre. God is guiding us all the family home to Himself & right will choose the best way. Believing this I can be happy trusting in Him

went down street and gathered up the threads again. Spent most of afternoon with Evelyn in the law library. went in even to Suffrage meeting. Heard Mrs. Catt and Miss Mills. went to reception after. Had a good time with the girls there. It is good to meet a new lot of girls again. They are a fine lot all together. It does seem good to be here. I can manage to get a lot out of being here a while. It is different a lot from any other place. It is amusing to see folks and they are of interest. I have high hopes of it. I can't tell by. God help us in this good time.

hard roads in a.m. pl. ten in p.m. Arminta brought a friend Selma Snyder down to play. S's home is in Phila. and she goes to Cornell. She beat Howard Leal and me at singles. Evelyn and Ben. the even. went about fixing up for our picnic which we have planned for tomorrow. It's a joy to get something up here because everyone is so ready to help and be interested. They are a lot of nice folks here if you only get to know them. Evelyn is my mind some of the sweetest girls I ever knew. She has had hard time and a lot of sorrow and it's not that joyful and happy

h. r. cut wood and fixed fire place at Fall Mills for picnic in P.M. We went up for supper and stayed the eve. There were nine of us, Paulin Glen, Aramita, Selma Snyder who is visiting her, Howard Lealo graham, Evelyn and Elsie Hennington. It was one of the nicest things I was ever in. It would be hard to pick out a nicer crowd. I hope we can have more of them. There is fun like a small well run picnic. The coffee we had in big tin cups was the finest I ever tasted. Bunty brought down a big pan of wonderful cream which added a lot but we walked home. There was no moon but the road was light enough.

h. r. also same in p m mostly rd. in even. It has been very quiet with me today. I have accomplished something which makes it worth while to live. I want to make this summer well worth while. I have great hopes for my life and its work. They will be very, very real but there is to be great things in it too. I believe under God I am going to do great things for Him on this world. I do not know just yet in what line my activities will lie

h.r. worked on mahogany and roads in p.m. went to see Elsie Hemmingson who is ever, Katy had a fine visit with Evelyn. Elsie is an interesting girl with a seeing mind and a good head. I want to get better to know her. Evelyn is a wonderful girl. Yes get along finely. She has those qualities of character which makes her attractive. She has a fine picture too which is to be seen on closer looking. She is to become a great friend of ours I hope. We have a good deal in common.

Ch & S.S. at 2nd Pres. rd. in P.M. Evelyn & I tried to go to Baccalaureate but found it too crowded. We then went to see the Kittredges a while. Florence is certainly the most beautiful child I ever saw. She is brighter than a star too. It is a joy to be with them. Katy Evelyn and I visited at her home. Every talk I have with her draws me to her more. She has those sterling qualities of mind and heart which make her a good companion and an intellectual inspiration. I learn something of every visit which adds to my brain wisdom and inspires a spiritual reaction for the good and right.

Evelyn and I have some good visits. She has a fine mind and a sweet spirit. I am impressed especially with a sense of delight to be able to spend an evening with her. She has a bubbling humor and a quick sympathy which makes her a wonderful companion. She loves children.

In the p.m. I let the young kids go out in the boats. The end of this place is to give them a good time so I suppose they ought to be provided for. My tent is a pretty good one. So goes life It's a funny thing

routine. the day began with rain. It is a common but not very joyful beginning to get up in the wet and try to organize life for the day under a dismal drizzle but it had to be done. It is a feature of touring which is not the most longed for. In p.m. I got roped into a five o'clock tea and had to paddle the Burnhams down to the end of the lake. They are a very uninteresting tribe. The only trouble with this place is the uninteresting crowd which frequents it. There is a flashy and vapid flavor to the guests of the Inn.

tried to make a fire with dry sticks rubbed together, but I did not quite succeed. It made me feel a good deal of respect for the aborigine who was compelled to succeed or go without cooking or warmth. I suppose if my dinner had depended upon my success I would have kept at it till I did really make a fire. I made plenty of smoke but I could not get it into a real coal. Cloudy & Rain Wea. WED. JULY 29, 1914 Ther. 55

We walked 10 miles through Wilmington Notch into Lake Placid. Nothing about this place appeals to me much. We put out at 1 p.m. stocked for the actual trip over Marcy. A drizzle of rain set in and continued all the rest of the day. We struggled along till most dark and finally came to a timber camp where French seemed to predominate. It was a very primative sort of community. We were given a deserted cabin where we built a fire in the wet stove and passed the night.

a bright morning cheered us up and we left our last settlement for many. We reached the top some minutes before noon. We had a wonderful view of a vast stretch of country, it showed it's great expanse of the Adirondacks lying out at our feet. It was too cold for us to spend much time so we soon left. We came down the famous John's Brook Trail, and made about 2½ miles by road to Elizabethtown where we put up for the night well tired out by our hard climbing

footsore and weary we plodded 10 miles through Elizabethtown where we got a good dinner at the hotel we reached home but late hrs and finally had a chance to rest from our work. In all we did about 104 miles of hard roads and trails. It was a trip which was well worth while and one which I love to repeat. Walking gives one a good foundation which to build for special endeavors. It is a good test for patience to be able to go on mile after mile. Know you there are many hills ahead and they are long

rested up all day. I did not feel so very tired but yet I found myself lying down most of the time. I am glad to be back again with the boys here. There is a new little Englishman in my tent now who is a great source of interest to us all and to me in particular. He is only nine but infinitely more mature than boys are here at a much more advanced age. It is an education to be with him and get the habit of his ponderous and intellectual way of approaching a problem no matter how simple it may be

a rest on the whole. Dinner was taken with the R's. Rev. Emunian was there and he was very interesting. We had tea at Baird May Ready's log cabin in the P.M. and got back a little before tea. Most of the time here is spent in idleness but I think that it is a kind of idleness that rebuilds and restores the energy lost during the past months. The Rev. Emunian an Armenian conducted the vesper service and it was a very good service. I wish I could do a little more work.

I know of no greater blessing than the simple love of a little boy like Sam or any of the others. It thrills me in a peculiar way. It is worth cherishing to the end of time

rd. By the fact that a boy named Curtis was sent in detention to me in the p.m. I was able to get into big life a bit. Everybody speaks ill of him but as I questioned him I found a lot of extenuating circumstances. With God's help I want to get a firm hold on him and gain his love. His life is poverty stricken for love. His parents are divorced and he has a step-father. He has lived mostly with his grandmother. What kind of reality of love has he known with such a background. Tous savoir c'est tout pardonner.

routine. Umpired a game had a talk with a boy named Curtis. I got down into his personality a bit with the hope of helping him. Took the boys over to roast marshmallows in even. Late in avenging the upsetting of our beds I had a great tussle with one boy. I conquered him finally without feeling I did him an injustice. It was quite a tussle however. I had to carry it through having started. These stubborn wills are grave problems and must be handled with great care for a young life is too precious a thing to endanger by unthinking anger.

we had a band concert in the a.m. The camp went to Reber in the afternoon. I remained the only officer with the boys who did not want to go. Everything went off very well. I had dinner and supper with the P.S. We sent a case of appendicitis off today. Just now one of my boys parted violently with his supper. These green apples are deadly and they and the small boy do get together so often.

Life here has no end of variations. A new thing comes up many times in the course of a day. It is a great education to be here and experience it.

Camp Penn came down for the day. We worked up the new camp song for the band in the p.m. It is becoming harder to keep one's temper placid all day long now. The kids are getting sophisticated as to camps and so are harder to control. It is quite a strain after two months of it. And yet at that one must maintain a perfect composure for the good of the boys for their eternal good may depend on the influences they meet with here. Many of them have not had ideal home surroundings and deserve the greatest pity and sympathy. This is hard to give at all times

idled most of the day. In the even. I stayed away from vespers and had a fine talk with Curtis. I am devoting a lot of thought to him. I believe it is worth every thing to get him around on the right track. He is a beautiful boy but his spirit has been broken and the world looks adverse to him. Little by little I am getting into his heart and I have found it a most wonderful thing. A life is a great thing to save and "he that winneth souls is wise". I believe this is a true saying and means what it says.

Had Curtis in arithmetic this morning. He got along very well indeed. He has a fine mind which is very quick indeed. I was very much delighted at the result of the first day of work with him. I have given him my best and I believe the result will be well. God always helps our efforts at regeneration.

2 to 4 pm A lot of the boys gathered in the dear little supper. I like nothing better than to have them come in and spend a while. Curtis came in and spent quite a while. We did not talk any but had a general visit which was perhaps a good variation

a very dreary day out of doors. I had my class with Curtis which went along very smoothly. I believe I am getting under his shell. He is a fine boy and it is pretty worth while to make an impression on him while the tree is green. He has not had as good a chance to be gentle and kind and thoughtful as many boys. When one looks closely into the case of each person it is pretty hard to condemn any one, yet I believe there is a place for condemnation in the ordering of the world. There must be for some

officer of the day. Boggy p.m. It is coming off clear and cold tonight. It gives promise of a wonderful night. I am sleepy tonight and it will be fine in bed and I hope the early morning will be cloudless for then the sunlight comes drifting through the trees and wakes me up. Camp is almost over. In many ways I am glad and then again I am sorry. This has been a wonderful summer I feel in many ways. The association with these boys is worth a great amount. It gives one a power of restraint and self-control which is very valuable

had my lessons and lay around. It rained most of the time after dinner. Log to walk and in eve. McKee went to play over his sister who is stranded in Paris due to the war. Billie Rider whose father's family are French can think of battles being fought over his uncle's lands where he has played. The war has thus come a little closer to my thoughts to all there. It hardly seems possible however that a war is raging so far away with men dying in a cause that is not needed

She is one of the most lovable boys I ever knew. I did not see any thing much of Spencer Curtis today. I want to keep in close touch with him till camp closes. Then I am going to rely on my prayers and letters to keep the spark within him fanned to a bright flame. A soul is the most worth while thing in all the world to save and keep on the right track

rd the papers and worked on McKee's little sailboat. Most of the p.m. was spent over the papers too. All evening I spent in the tub with the boys. We had a beautiful time. They were with them as the best of all. I love them more every day. They are a most lovable lot. Little Ridley who is half French has a very intimate connection with the war. His grandmother's place is just where there is heavy fighting now. It does not seem possible that such a war can continue

stayed in camp. In the p.m. we went up to Maloney's for a swim. De Reest & Lapar is here. Heard I had a steering trip in the sailboat till the mast snapped off even with the deck. We got home with the aid of oars which were kindly brought to us. Later we had a hard battle with the wind and waves in a canoe. It was all most exciting and good exercise. In the eve we had Vespers and I wrote a long letter to Ellen. I must stick and gain the end I desire viz a knowledge of what we really think about God. Pray that he may respond in a way to warm my heart and that Ann Margret may need it.

baseball game in a.m. for ice cream. bbq in p.m. Faculty beat us even. I saw for the first time tonight the aurora borealis streaming up in the northern sky. It was indeed a beautiful sight. The air was cold and clear and the dip in the morning was very spicy.

The time here is short now. Soon it will be over. I believe it has been profitable for me to be here this summer. Association with the boys I have had has been a great thing. Inez Lee is the dearest little fellow I ever saw. Horace is fine too

It was a very snappy day as to weather. Roland Severance came up and spent a part of the day. In the evening Curtis came in. He has come to be quite friendly. I do not know what the outcome will be. I have done quite a lot for him and I am really interested in his welfare. What the end will be God alone knows.

The days are gliding swiftly by and no one knows how many more of them they will be. Life is altogether uncertain and not to be trusted. If I had no God I would not know what to do nor where to turn

last day of regular camp routine. In the afternoon my team took the camp championship. It was a good game. It has been cold and clear all day making life very snappy. It has been a beautiful day altogether. Sam came to me at noon time and told me how much he liked me. He touches my heart more than any other person in camp. He is the greatest personality of the boys I have near me. I hope to see a lot of him in the weeks that are to come this winter

The last day of camp. I spent most of the morning packing trunks and getting things in shape. I worked on Sam's boat in the afternoon. In the even. there was the big banfet and candy. The band played and watermelons were distributed. My tent got a big for for the fourth best tent during the year.

This summer has been profitable in many ways to me. The friendship of Sam has been the greatest acquisition I believe. He is a wonderful boy and I forsee for him a great career. He has the essentials of a commanding character and with a deep sense of his relationship to God he will have a wonderful life.

left camp. stopped off at Saratoga. found Paynes here in Delhi. I was indeed glad to see them. They are the best folks I know anything about. Dad and I had a big discussion over the cause of the war.

Sam kissed me good-bye in a way I would never forget. It was one of those rare kisses that mean so much. His whole loving little heart seemed to be in it and it was returned just as fervently. I do love him with a deep and lasting love. I have prayed over him when asleep for his future that he may be a chosen vessel of God in a great work.

spent the day with the Baynes. We expected Donald but he did not show up. Well I am glad to see Anny Mac gregor again. Just to be near her is a great joy. She is the best friend I have in the world and I feel toward her as toward no other living soul.

I have thought of McKee a lot too. He worked his way into my heart as few have ever done. For him I feel a simple deep love. His good-bye kiss as I look back upon it was one of the sweetest things that ever happened to me. It was the sign of his love for me which gives me a great feeling of happiness. A great joy in my heart is tempered perhaps sweetened, by a sense of awful responsibility. God has answered my prayers. As Mac said we three can negotiate life together. She and I asked God to bless us who are to be no longer separate in purpose but one in love and one in Christ. By a strange coincidence I read in the Bible this morning Proverbs 31. It was one of these cloudy things which make you want to rush all the way to Charleston and kiss her. She felt she had the solution to her coming up here almost in hand. I certainly hope that this is so. I believe it will work out in time. God is with us and done so wonderfully so far that He will see us through to the very end. I love Anne MacGregor more and more

ch. coll. worked on essay. committee meeting for campaign next March. went to lecture on "Some war experiences" in Eng. It was very thrilling. Went up to Crosby's room, lab and had a hot dog and a cup of cocoa.

I am very anxious to make a lot of headway with my essay before Christmas. There is a lot to be done on it and I am very much interested in it. I believe it will be a very well worth while effort I want to put my best into it and have an event

ch. worked cal. left Pg 1243 an Phila 2 P.M. bought a string of gold beads to give Anne Macgregor for Christmas. Had dinner at the Belleau Stratford with Gatlin Parker, Cathey and Anne Macgregor. It was a sudden and lovely surprise that I could see her again here this week. She is the light of my life. She is the most wonderful person I ever saw in all the world. It is hard to believe that she is to be my wife, that she loves me better than all the world, that I stand alone in her heart and beside me there is no living being. God grant me to be worthy of her.

Ch. visited with Agnes Macgregor most of day. Left with her at 6 o'clock & came home alone at 8 o'clock. She went on to Convent. It was an awful night, cold, windy and wet. It seemed too bad to leave her in the cheerless light alone. Some day there will be no parting. Of an evening when it is inclement outside we cancelle down before the fire & read and talk and realize the length and depth of the wonder of being together. Great indeed with joy of looking forward. I pray for success in my work that the future for may be without alloy

ch. coll. this is one of the worst days for weather I ever saw. I studied and didn't mind it much. The wind howls and there is thick on the trees. It's an ideal day for the season. This is the time when the heart of man turns to the fireside. The Saxon was wont to gather in the mead-hall now when the blasts of December made the ocean even too boisterous for his daring soul to endure. Now I think of the days I pray when I may sit by my fire-side and [illegible] with my sweetheart Anne Macgregor

ch. coll. stu all day. telephoned Anne MacGregor in town. It seems she lost her pocket-book and had a great time getting to convent. Poor child she needs a protector all right. It makes my heart ache to think of the agony she must have felt at finding she had lost it. I know the sensation. I pray she may not worry over it for it is over now. Oh! may the day hasten till I may be with her to help her and, take from her tender shoulders the cares of life. I told John about her thought that we were to be married and he was happy.

ch. coll. Anne Mac gregor had quite a harrowing experience by losing her purse. I pity the poor little girl. I hate to contemplate her in the predicament. Henry van Dyke minister to Holland spoke on the war. He has been on the battlefields and was very interesting.

We had schmelting treat in the room later. I wrote to Anne Mac gregor and the folks.

Every day makes my life seem fuller. I feel the call of God to do great things for Him. I believe I have a great mission to the world. I pray to keep close to Him that I may understand the way to turn always and be ready to obey

Ch. coll. worked practically all day on gun assay and did a good work. Fu, Ll Lai-chen. Ll boy came in and did made something eat I feel like I've lived days. Oh; that I could do a little more in thirty every hour is full and yet not so very much it show for it. The days are gliding very swiftly but they cannot go too quick for me. I am anxious now to hurry along this short life but I have work to do and it will be done

Ch. Macfall of Phila preached. John Wolf came down to lunch. Ate talked up to P.M. & spoke of 1918 Prayer meeting in the eve. Ah how Lurch I could have a visit with Ann Macgregor. She is my ideal girl now. I feel that in her lies my great earthly inheritance. The love is so wonderful deep and creeping. To be near her will mean that my life will grow & expand as it has not for years. Edwin does well and she can unpack by [illegible]

Ch. coll. comm. met stu, went out in every. I saw the two I whom I was appointed and was successful. I dropped in a freshman's room and got a Bible class. Prayer group started. I played with Lippy and it meant something a lot. He is one of those fine Scotch-Irish Virginians. He lives in a log house some miles from Washington where he had his education.

Thus the day went well while staying. Ever did. I believe it means greater things in the future. May God give me strength.

ch. coll. comm. meeting. took a nap. saw the funniest movie in the even. that I almost ever saw. It came as a fine break in the days. I don't go to the movies once a month. Alin and Dyd were along which made it better.

Life is coming to be a tremendously exciting and intensely absorbing thing. I am glad for the years past when I did keep to myself. I gained a love for books and study and I can always have that to draw upon and thereby make my life more rich and useful to those around me.

wrote about nine hours on my essay and made quite a progress in it. It is beginning to shape up now so that I can see where I am coming out. Hitherto I have been boring into it without being able to see the end except in dim out-line. I have put a good deal of work on it so far and I believe the labor will prove worth while. I have prayed for it and have enjoyed it. I would be so happy if I could get it published by some firm and perhaps get a good price for it. I do not see why I should not. Others have done it.

Ch. went over to Sem and had a fine talk with one Macay who went to college at Aberdeen. He told me all about the Sem. work there and the cost. I find it is very cheap and they say it means that it is within my power. Anne MacGregor can go too. I propose doing my if so that that will be possible. From all I can find it will be one of the most wonderful of years imaginable. John perhaps will be along which will make perfection very nice in addition. Rise winded for full for utterance.

ch. coll. comm. meet. tried to call Anne MacGregor but she had gone to N.Y.C. visited with John Mott and Lake with Frank Glick. We all went over to Renwicks and had something to eat. Those two boys are very wonderful. This year has meant more to me than any ever. So many new and great factors have come into my life. God has led me in a way that I knew not. All His ways are wonderful and so very beautiful.

Anne MacGregor has been the torch that has lighted these fires of earth here. She was the gift of God to me to save me from myself.

ch. coll. worked on essay. Mr. Spence in even. Now I begin to feel that the essay is nearing completion. I can count on my fingers what has to be done. I have the material well in hand for what remains. I hope this rather big effort I have made will prove to be worth the trouble. I would love greatly to have it printed by some concern in a magazine. Perhaps it will prove to be worth it.

Anne MacGregor is safe home and happy I pray. Oh! Heavenly Father may I be always worthy of the great love I have the one greatest thing of human factors in my life.

I thank Thee for it

ch. coll. prepared to depart and did so at 3:37 p.m. ar. Ph 5:19. P.M. it is even. I am glad to be home. It would be very wonderful to be with me Mae Grega on Christmas but it does not seem wise this year and must be forgotten. I hope to see her soon however. She is the light of my life. All the beauty and sweetness of womanhood is in her. The wonder of her comes over me in great surging waves. To think that she loves me and will forever. Oh how much it stirs my heart to make my life count for the very most. God aid me. I feel the power behind all my life to be good

went down town stayed about home rest of day. read what I have done on my essay to the Folks.

Another Christmas Eve! How much has happened since my last one! Life is a most profound thing. A great war lies upon Europe. All the joy of how many thousand homes is shattered this night. How many fire-sides miss him who was the mainstay and center of life. How many fire sides are only a cold damp mass of ruins this night. How many stand this night before the great Unity Throne who were last Christmas with the Sweetheart or not yet in that line

christmas an unexpected present from Grandpa made it possible for me to go to Rochester. In p. m. I went up to Princeton to pack a suit case with some things I expected to need. The day was a very excited one. In even. at 8:35 I left on the sleeper. Rd in "The Romance of Preaching" a while and went to sleep to dream of my Sweetheart. It all shows how God brings things about so that we may have joy in this life. All things do indeed work together for good to them that love God and all called according to his purpose

on. Pittsford 9 + 9 m. John and Anne Macgregor met me at the station. What a happy vision she was outin the cold bright snow covered world. In the p.m. we went sliding down hill and had a beautiful time. John stayed out at home all day. rain in the even. Anne Macgregor and I had a most wonderful visit. It was just such a kind of a visit as I had dreamed of. The fire, the cold moonlight outside, the warmth and beauty of the room and Anne Macgregor the lovely and wonderful all

missed the 10 o'clock car for church and drove in a sleigh to Tobbs Hill where Amy Macgregor and I got to church some late (Sunday) heard the end of Dr. Scott's sermon and saw Ted Bruggock. Visited with Mrs Payne in p.m. The Parkers came in to tea and some of us went back with them. There we bathed till long after midnight all together and John and I got a hold on each other. I think I found out more about him than he did about me. Tried to ask impersonal and judicious questions to draw him out which I did

arce quite late. Stayed the day within doors. We danced quite a while and enjoyed ourselves fooling around while the girls baked some cakes for a tea. In the even. we played "I doubt it" but the folks went off to bed and Anne MacGregor visited late. Before we quit the moonlight shone on the window upon her hair as she reclined on the mahogany davenport which is upholstered in dark blue, a fair sight indeed for anyone to behold. She is a very wonderful sweetheart

arer late came into town at noon. Spent p.m. with Mrs. Sayre left 8.27 p.m. my birthday. The days flew by and left a sweet set of memories. Ann MacGregor means more to me than ever. Every line of visiting leaves her imprinted more deeply on my soul. I feel myself an experience which seem far greater than the usual. I can't believe that all have such lofty ideals as I have. The soul of Ann MacGregor is indeed a light which shines and shines forever

an Ph. 10 a.m. worked at Univ of Penn. library. down street in p.m. Another year has gone by. What great doings have transpired! Yet withal I can not say it go and I stand on the threshold of a new year full of great thanksgiving to my God who has brought me through all by His might preparing me for some great work.

I have found my wife and my life work this year. What greater crises come in the early life of man? I have come closer to my parents and to humanity. I press on with high calling of Christ my Savior.

A Merry Christmas

In my own sweetheart-
I have been to lay all your
life for dear next sunday,
only five days more upon earth
for you. Then after that
are to be at rest forever
the night I am, if there is
immediately!

To My Own Sweetheart.

If you don't like it, it is easily changed, but not unto you if you don't like them when I select them a little later -

Hy. -

To My Own Sweetheart. to make sure that he prepare properly for a visit to his Sweetheart. It is well recommended for complete secrecy & surer cases behind the face!

I love you —

This is sent along to My Sweetheart, so he may have two packages and because I can tuck love notes the pages - and (on the side)
